The Technical Proposal shall not include any financial information. A Technical Proposal containing material financial information shall be declared non-responsive.
- 15.2 Consultant shall not propose alternative Key Experts. Only one CV shall be submitted for each Key Expert position. Failure to comply with this requirement will make the Proposal non-responsive.

**16. Financial Proposal**

- 16.1 The Financial Proposal shall be prepared using the Standard Forms provided in Section 4 of the RFP. It shall list all costs associated with the assignment, including (a) remuneration for Key Experts and Non-Key Experts, (b) reimbursable expenses indicated in the Data Sheet. Irrespective of the consultant selection method, any Consultant that does not submit itemized and priced financial proposal, or merely refers the Procuring Entity to other legal instruments for the applicable minimum remuneration fees shall be considered non-responsive.

## **23. Public Opening of Financial Proposals**

### **23.1 Unsuccessful Proposals**

After the technical evaluation is completed, the Procuring Entity shall notify those Consultants whose Proposals were considered non-responsive to the RFP and TOR or did not meet the minimum qualifying technical score, advising them the following: (i) their Proposal was not responsive to the RFP and TOR or did not meet the minimum qualifying technical score; (ii) provide information relating to the Consultant's overall technical score, as well as scores obtained for each criterion and sub-criterion; (iii) their Financial Proposals will be returned unopened after completing the selection process and Contract signing; and (iv) notify them of the date, time and location of the public opening of the Financial Proposals and invite them to attend.

The Financial Proposals shall be opened publicly by the Procuring Entity's opening committee in the presence of the representatives of the Consultants and anyone else who chooses to attend. Any interested party who wishes to attend this public opening should contact the Procuring Entity as indicated in the Data Sheet. At the opening, the names of the Consultants, and the overall technical scores, including the break-down by criterion, shall be read aloud. Copies of the record shall be sent to all Consultants who submitted Proposals.

- 24.2 Time-Based Contracts-If a Time-Based contract form is included in the RFP, in case of discrepancy between (i) a partial amount(sub-total) and the total amount, or (ii)between the amount derived by multiplication of unit price with quantity and the total price, or (iii) between figures and words, the later will prevail. In case of discrepancy between the Technical and Financial Proposals in indicating quantities of input, the Technical Proposal prevails and the Procuring Entity's evaluation committee shall correct the quantification indicated in the Financial Proposal so as to make it consistent with that indicated in the Technical Proposal, apply the relevant unit price included in the Financial Proposal to the corrected quantity, and correct the total Proposal cost.
- 24.3 Lump-Sum Contracts - If a Lump-Sum contract form is included in the RFP, the Consultant is deemed to have included all prices in the Financial Proposal, so neither arithmetical correction nor price adjustments shall be made. The total price, net of taxes understood as per ITC 24 below, specified in the Financial Proposal (Form FIN-1) shall be considered as the offered price.

## **25. Taxes**

- 25.1 Subject to ITC 24.2, all taxes are deemed to be included in the Consultant's financial proposal as separate items, and, therefore, considered in the evaluation.
- 25.2 All local identifiable taxes levied on the contract in voices (such as sales tax, VAT, excise tax, or any similar taxes or levies) and in come and withholding tax payable to Kenya on the remuneration of non-resident Experts for the services rendered in Kenya are dealt with in accordance with the instructions in the Data Sheet.

27.2 In the event of identification of a potentially Abnormally Low Price by the evaluation committee, the Procuring Entity shall seek written clarification from the firm, including a detailed price analyses of its price in relation to the subject matter of the contract, scope, delivery schedule, allocation of risk and responsibilities and any other requirements of the RFP document.

27.3 After evaluation of the price analyses, if the Procuring Entity determines that the firm has failed to demonstrate its capability to perform the contract for the offered price, the Procuring Entity shall reject the firm's proposal.

## **28. Abnormally High Prices**

28.1 An abnormally high price is one where the proposal price, in combination with other constituent elements of the proposal, appears unreasonably too high to the extent that the Procuring Entity is concerned that it (the Procuring Entity) may not be getting value for money or it may be paying too high a price for the contract compared with market prices or that genuine competition between Consultants is compromised.

28.2 In case of an abnormally high tender price, the Procuring Entity shall make a survey of the market prices, check if the estimated cost of the contract is correct, and review the RFP to check if the specifications, TOR, scope of work and conditions of contract are contributory to the abnormally high proposals. The Procuring Entity may also seek written clarification from the Consultants on the reason or the high proposal price. The Procuring Entity shall proceed as follows:

- i) If the proposal price is abnormally high based on wrong estimated cost of the contract, the Procuring Entity may accept or not accept the proposal depending on the Procuring Entity's budget considerations.
- ii) If specifications, TOR, scope of work and/or conditions of contract are contributory to the abnormally high proposal prices, the Procuring Entity shall reject all proposals and may re-invite for proposals for the contract based on revised estimates, specifications, TOR, scope of work and conditions of contract.

28.3 If the Procuring Entity determines that the Proposal Price is abnormally too high because genuine competition between Consultants is compromised (*often due to collusion, corruption or other manipulations*), the Procuring Entity shall reject all Proposals and shall institute or cause competent Government Agencies to institute an investigation on the cause of the compromise, before re-inviting for proposals.

## **29. Combined Quality and Cost Evaluation**

### 32.6 Financial negotiations

The financial negotiations include the clarification of the Consultant's tax liability in Kenya and how it should be reflected in the Contract. All applicable taxes shall be itemized separately and included in the contract price.

32.7 If the selection method included cost as a factor in the evaluation (that is QCBS, FBS, LCS), the unit rates and the total price stated in the Financial Proposal for a Lump-Sum contract shall not be negotiated.

32.8 Where QBS or CQS methods was used for a *Lump-sum Contract* as indicated in the RFP, the unit rates negotiations shall not take place, except when the offered Key Experts and Non-Key Experts' remuneration rates are much higher than the typically charged rates by consultants in similar contracts or the professional practice. In such case, the Procuring Entity may ask for clarifications and, if the fees are very high, ask to change the rates. The format for (i) providing information on remuneration rates in the case of QB and CQS; and (ii) clarifying remuneration rates' structure under this Clause, is provided in Appendix A to the Financial Form FIN-3: Financial Negotiations – Breakdown of Remuneration Rates. *(Appendix shall not be modified)*

#### Purpose

The government of Kenya's Anti-Corruption and Economic Crime laws and their sanction's policies and procedures, Public Procurement and Asset Disposal Act (*no. 33 of 2015*) and its Regulation, and any other Kenya's Acts or Regulations related to Fraud and Corruption, and similar offences, shall apply with respect to Public Procurement Processes and Contracts that are governed by the laws of Kenya.

A few of the provisions noted below highlight Kenya's policy of no tolerance for such practices and behavior:

- (6) An employee, agent or member described in subsection (1) who refrains from doing anything prohibited under that subsection, but for that subsection, would have been within his or her duties shall disclose the conflict of interest to the procuring entity;

- (7) If a person contravenes sub section (1) with respect to a conflict of interest described in subsection (5)(a) and the contract is awarded to the person or his relative or to another person in whom one of them had a direct or indirect pecuniary interest, the contract shall be terminated and all costs incurred by the public entity shall be made good by the awarding officer.

      - ii) Acts intended to materially impede the exercise of the PPRA's or the appointed authority's inspection and audit rights provided for under paragraph 2.3e. below.
  - b) Defines more specifically, in accordance with the above procurement Act provisions set forth for fraudulent and collusive practices as follows:  
 "fraudulent practice" includes a misrepresentation of fact in order to influence a procurement or disposal process or the exercise of a contract to the detriment of the procuring entity or the tenderer or the contractor,  
 and includes collusive practices amongst tenderers prior to or after tender submission designed to establish tender prices at artificial non-competitive levels and to deprive the procuring entity of the benefits of free and open competition.

## FORM FIN 3D: BREAKDOWN OF REMUNERATION RATES [FOR TIME BASED CONTRACTS ONLY]

### 1. Review of Remuneration Rates

- 1.1 The remuneration rates are made up of salary or abase fee, social costs, overheads, profit, and any premium or allowance that may be paid for assignments away from headquarters or a home office. Form FIN3 C can be used to provide a breakdown of rates.
- 1.2 The Form FIN 3C shall be completed and attached to the Financial Form-3. As agreed at the negotiations, breakdown sheets shall form part of the negotiated Contract and included in its Appendix D or C.
- 1.3 At the negotiations the firm shall be prepared to disclose its audited financial statements for the last three years, to substantiate its rates, and accept that its proposed rates and other financial matters are subject to scrutiny. The Procuring Entity is charged with the custody of government funds and is expected to exercise prudence in the expenditure of these funds.

### 2. Rate details are discussed below:

- (i) Salary is the gross regular cash salary or fee paid to the individual in the firm's home office. It shall not contain any premium for work away from headquarters or bonus, except where these are included bylaw or government regulations.
- (ii) Bonuses are normally paid out of profits. To avoid double counting, any bonuses shall not normally be included in the "Salary" and should be shown separately. Where the Consultant's accounting system is such that the percentages of social costs and overheads are based on total revenue, including bonuses, those percentages shall be adjusted downward accordingly. Where national policy requires that 13 months' pay be given for 12 months' work, the profit element need not be adjusted downward. Any discussions on bonuses shall be supported by audited documentation, which shall be treated as confidential.
- (iii) Social Charges are the costs of non-monetary benefits and may include, inter alia, social security (including pension, medical, and life insurance costs) and the cost of a paid sick and/or annual leave. In this regard, a paid leave during public holidays or an annual leave taken during an assignment if no Expert's replacement has been provided is not considered social charges.
- (iv) Cost of Leave The principles of calculating the cost of total days leave per annum as a percentage of basic salary is normally calculated as follows:  

$$\text{Leave cost as percentage of salary} = \frac{\text{total days leave} \times 100}{[365 - w - ph - v - s]}$$
 Where w = weekends, ph = public holidays, v = vacation, and s = sick leave.  
 Please note that leave can be considered as a social cost only if the Procuring Entity is not charged for the leave taken.
- (v) Overheads are the Consultant's business costs that are not directly related to the execution of the assignment and shall not be reimbursed as separate items under the Contract. Typical items are home office costs (non-billable time, time of senior Consultant's staff monitoring the project, rent of headquarters' office, support staff, research, staff training, marketing, etc.), the cost of Consultant's personnel not currently employed on revenue-earning projects, taxes on business activities, and business promotion costs. During negotiations, audited financial statements, certified as correct by an independent auditor and supporting the last three years' over heads, shall be available for discussion, together with detailed lists of items making up the overheads and the percentage by which each relates to basic salary. The Procuring Entity does not accept an add-on margin for social charges, overhead expenses, etc. for Experts who are not permanent employees of the Consultant. In such case, the Consultant shall be entitled only to administrative costs and a fee on the monthly payments charged for sub-contracted Experts.
- (vi) Profit is normally based on the sum of the Salary, Social costs, and Overheads. If any bonuses paid on a regular basis are listed, a corresponding reduction shall be made in the profit amount. Profit shall not be allowed on travel or any other reimbursable expenses.
- (vii) Away from Home Office Allowance or Premium or Subsistence Allowances Some Consultants pay allowances to Experts working away from headquarters or outside of the home office. Such allowances are calculated as a percentage of salary (or a fee) and shall not draw over heads or profit. Sometimes, by law, such allowances may draw social costs. In this case, the amount of this social cost shall still be shown under social costs, with the net allowance shown separately.

**FORM FIN-4 BREAKDOWN OF REIMBURSABLE**

When used for Lump-Sum contract assignment, information to be provided in this Form shall only be used to demonstrate the basis for calculation of the Contract ceiling amount, to calculate applicable taxes at contract negotiations and, if needed, to establish payments to the Consultant for possible additional services requested by the Procuring Entity. This form shall not be used as a basis for payments under Lump-Sum contracts. This form shall be filled for Time-Based Contracts to form the basis of contract negotiations.

## SECTION 5. TERMS OF REFERENCE

### 1.0 BACKGROUND

The Capital Markets Authority (CMA) is a Statutory Agency charged with the prime responsibility of regulating and facilitating the development of orderly, fair, and efficient Capital and Spot Commodity Markets in Kenya. The Authority licenses and supervises market intermediaries, conducts on-site and off-site market surveillance and enforces compliance, and promotes market integrity and investor confidence.

The principal objectives of CMA as set out in the Capital Markets Act (Chapter 485A) are:

- a) The development of all aspects of the capital markets with particular emphasis on the removal of impediments to, and the creation of incentives for, longer-term investments in productive enterprises.
- b) The facilitation of the existence of a nationwide system of the stock market and brokerage services to enable wider participation of the general public in the stock market.
- c) The creation, maintenance, and regulation of a market in which securities can be issued and traded in an orderly, fair, and efficient manner, through the implementation of a system in which the market participants are self-regulatory to the maximum practicable extent.
- d) The protection of investor interests.
- e) Facilitation of a compensation fund to protect investors from financial loss arising from the failure of a licensed broker or dealer to meet the contractual obligations; and,
- f) The development of a framework to facilitate the use of electronic commerce for the development of capital markets in Kenya.

The Authority recognizes that it exists to provide value for its stakeholders in an environment full of uncertainty. This uncertainty presents both risk and opportunity with the potential to erode or enhance value. The Authority Board and Management therefore has in place an Enterprise Risk Management (ERM) Framework to guide dealing with risks and opportunities as they arise and to enhance its capacity to build value for its stakeholders. The purpose of a risk management framework is to assist the Authority in integrating risk management into significant activities and functions.

Establishing an ERM framework is also a legal requirement as per the Public Finance Management (PFM) Act 2012; the Mwongozo, Code of Governance for State Corporations (Mwongozo) for Boards and CEOs and Treasury circular no 3 of 2009. Public institutions are required to establish risk management strategies which include fraud prevention mechanism and ensure the system of risk management and internal controls support the institution to have robust business processes (i.e., risk management must be integrated with the strategy and operations of the institution).

The Authority therefore has in place an ERM Framework that is continually implemented and overhauled with every new long range 5-year Strategic Planning cycle. In August 2017, the Authority Board and Management adopted a revised ERM Framework, with the aim of enhancing the Authority's ability to meet its objectives. The Authority has since developed a new strategic plan for 2023-28 and therefore an overhaul of the framework is necessary to align it to the strategic direction and ensure its continued alignment to international standards and best practices (such as ISO 31000, COSO, etc.), national policy guidelines on risk management and incorporate predictive risk management.

CMA thus seeks to engage a consultant or Firm of Consultants with impeccable understanding of and experience in the development of enterprise risk management frameworks to facilitate CMA in reviewing and enhancing its existing ERM framework and undertake a risk assessment to align the Authority's framework to its newly developed 2023-28 Strategic Plan, international standards and best practices, national policy guidelines on risk management and incorporate predictive risk management (experience in the financial market regulation sector in any regulatory jurisdiction will be a distinct advantage).

## 2.0 OBJECTIVES

The consultancy is aimed at facilitating the Authority review and enhance its enterprise risk management framework to ensure its continued alignment to its strategic direction, international standards and best practices (such as ISO 31000, COSO, among others), national policy guidelines on risk management and incorporate predictive risk management. This will ensure that all the current and future material risk exposures of the Authority are appropriately identified, quantitatively and qualitatively assessed, proactively anticipated, and appropriately mitigated, monitored and reported.

In addition to assessing existing risks and opportunities, the framework should incorporate methodologies and tools for predicting emerging risks, opportunities and trends. This will enable the Authority to be proactive in identifying potential risks and opportunities and taking timely preventive and/or exploitation measures. Predictive risk management activities should be integrated into the day-to-day business operations and decision-making processes of the Authority.

## 3.0 SCOPE OF WORK

The Scope of the work will be to review and enhance the current risk management framework, facilitate the conducting of Authority wide risk assessment and development of mitigation strategies for identified root causes of risks and opportunities and to subsequently update and/or develop an enterprise risk management framework with a new (where necessary) risk and opportunities register. In order to identify the external risks, the consultancy may involve interviewing CMA's key stakeholders.

## 4.0 TASKS

The identified consultant will facilitate management in reviewing and enhancing the Authority's ERM framework by undertaking the following tasks:

- a) Undertake an initial maturity assessment of the Authority's ERM framework on commencement of the consultancy and table to Management a report identifying gaps and giving proposals for their resolution. At the end of the consultancy, the consultant will also be required to edit the report to update for any gaps that may have been addressed during the consultancy and highlight any residual gaps for addressing going forward.
- b) Review the Authority's internal and external environment and work together with management to:
  - i. Refine the risk management policy, philosophy and articulate suitable risk appetite statements that encompass predictive risk management. The risk appetite statements should be fully aligned to the Authority's vision, mission, values, objectives and overall mandate.
  - ii. Determine risk tolerances and risk thresholds that reflect the Authority's proactive approach to predictive risk management.
- c) Review the existing Enterprise Risk Management Framework and risk and opportunities register to:
  - i. Assess the effectiveness of the current framework in addressing predictive risk management and propose necessary adjustments.
  - ii. Identify areas for improvement to better capture and anticipate emerging risks and trends.
- d) Identify internal and external events affecting the achievement of the Authority's objectives, with a focus on predictive risk factors. Determine the causes (risk drivers) of the specific risks identified and the linkages between these different risks. This will include:
  - i. Identifying potential emerging risks and trends relevant to the Kenyan capital market, from a regulatory perspective, and
  - ii. Assessing capital markets sector specific risks to the Authority's strategic, operations, reporting and compliance objectives, including predictive elements.

- e) Conduct a comprehensive risk assessment that integrates both existing and predictive risks. This should:
  - i. Ensure all risks are assessed by considering their probable likelihood and potential impact, and proactively anticipate emerging risks.
  - ii. Map out the risks, including emerging risks and trends, to aid their prioritization and develop a risk heat map tool that accounts for both current and future risk exposures.
- f) Develop an appropriate revised enterprise risk management framework for the Authority that integrates predictive risk management principles, methodologies, and tools. The framework should:
  - i. Incorporate predictive risk assessment techniques and models to identify and assess emerging risks.
  - ii. Integrate predictive risk mitigation strategies and response options into the risk management framework.
  - iii. Include mechanisms for monitoring and reporting on predictive risk factors, enabling proactive decision-making and timely preventive measures.
- g) Review the Authority's risk monitoring mechanism and recommend improvements that enhance the integration of quantitative tools and measures for predictive risk management.
- h) Prepare draft reports for discussion with the Capital Markets Authority, including the risk assessment findings and the revised risk management framework's components related to predictive risk management.
- i) Present the draft reports including the risk assessment and revised risk management framework to the board, management and staff, emphasizing the incorporation of predictive risk management.
- j) Edit the reports to incorporate comments from the Authority and present the final reports in a session with Authority's Management and the Board.
- k) Undertake capacity building on Enterprise Risk Management with a specific focus on predictive risk management. Provide training and knowledge transfer to the Authority's Board, Management, risk champions and staff, highlighting the importance of proactive risk identification and the use of predictive risk management techniques.
- l) Develop a detailed program to support capacity building and identify core skills to be developed to support operational practices aligned with the new risk management principles, including predictive risk management.
- m) The consultants should review the current automation level of the Risk Management process at the Authority and advise on improvements based on the risk assessment methodology that will be adopted.

## 5.0 OUTPUT

The key output from the consultancy will be:

- a) A consultancy inception report.
- b) A maturity report on the current ERM framework, including an assessment of its effectiveness in incorporating predictive risk management.
- c) Capacity building workshops targeting the Board, management, risk champions and staff (Staff will be divided into different groups)
- d) Facilitative workshops for Management and Risk champions to undertake the risk assessments.
- e) A detailed report on risk assessment of the Authority, highlighting both existing and predictive risks. This report should include an assessment methodology, ranking of risks (including emerging risks and trends) and mitigation factors.
- f) A revised Enterprise Risk Management Framework that explicitly integrates predictive risk management principles, methodologies, and tools. This framework should encompass risk appetite statements and risk tolerances that account for proactive identification and mitigation of emerging risks.
- g) A work plan for knowledge transfer activities related to the development of suitable corporate risk management tools, techniques, practices, and processes. This plan should specifically address predictive risk management and provide guidance on its application within the Authority's day-to-day operations and decision-making processes.

- h) Revised Risk and opportunity register of the Authority that includes both existing and predictive risks, enabling proactive management and mitigation.

## SECTION 6. CONDITIONS OF CONTRACT AND CONTRACT FORMS

### Preface

1. This Section includes two types of standard contract forms for: A Lump-Sum Contract and a Time-Based Contract. Each type includes General Conditions of Contract ("GCC") that shall not be modified, and Special Conditions of Contract ("SCC"). The SCC includes clauses specific to each contract to supplement, but not over- write or otherwise contradict, the General Conditions of Contract.
2. Lump-Sum Contract. This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as draft or final reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified out puts and milestones. Never the less, quality control of the Consultant's outputs by the Procuring Entity s paramount.
3. Time-Based Contract. This type of contract is appropriate when it is difficult to define or fix the scope and the duration of the services, either because they are related to activities carried out by others for which the completion period may vary, or because the input of the consultants required for attaining the objectives of the assignment is difficult to assess. In time-based contracts the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is determined on the basis of the time actually spent by the Consultant in carrying out the Services and is based on (i) agreed upon unit rates for the Consultant's experts multiplied by the actual time spent by the experts in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of contract requires the Procuring Entity to closely supervise the Consultant and to be involved in the daily execution of the assignment.
4. The templates are designed for use in assignments with consulting firms and shall not be used for contracting of individual experts. In some consultancy assignments such as design and construction supervision, both Lump- Sum and Time-Based Contracts are used and signed with the Consultant. In that case, the Lump-Sum Contract would apply for the design part of the Services while the construction supervision part would be based on a Time- Based Contract. In such event, both types of contracts shall be signed at the same time.
